Praevor Privacy Policy

Effective date: November 3, 2026

This Privacy Policy explains what information Praevor ("the Bot", "we", "us") collects, how it is used, and what choices you have. The Bot is operated by Praevor and is available at github.com/praevor/bot. By adding the Bot to a server or interacting with it, you agree to this policy.

Contact: nameless@thenamelessdev.com

1. Information We Collect

The Bot only collects what it needs to work. Depending on which features are enabled, this may include:

- **Discord identifiers:** user IDs, server (guild) IDs, channel IDs, role IDs and message IDs.
- **Basic profile data:** usernames, display names and avatar URLs, as provided by Discord when you use a command or an event the Bot listens to.
- **Server configuration:** settings that server administrators choose, such as prefixes, enabled modules, log channels, and role mappings.
- **Moderation and activity records:** actions taken through the Bot (for example warnings, kicks, bans, notes, or shift and session logs), including the moderator, the target user, the reason and a timestamp.
- **Command usage data:** which commands were run, when, and where, used for rate limiting, debugging and abuse prevention.
- **Linked third-party account data (only if you choose to link it):** for example a Roblox user ID or username, or a server API key supplied by an administrator.
- **Technical logs:** error logs and diagnostic information, which may include IDs related to the command that caused the error.

What we do not collect: passwords, payment information, direct messages between you and other people, or the content of messages that are not commands directed at the Bot. The Bot does not collect data it does not need to run its features.

2. How We Use Information

We use the information above to:

- Provide, operate and maintain the Bot's features.
- Store and apply the settings and records that server administrators create.
- Prevent abuse, enforce our Terms of Service and keep the Bot secure.
- Diagnose bugs and improve performance and reliability.
- Respond to support requests and comply with legal obligations.

We do not sell your data, rent it, or use it for advertising or profiling.

3. Legal Bases (EEA / UK Users)

If you are in the European Economic Area or the United Kingdom, we process personal data under these bases: **legitimate interests** (operating, securing and improving the Bot), **performance of a contract** (providing the service to server administrators), **consent** (where you link an external account or opt in to a feature), and **legal obligation** where applicable.

4. Sharing of Information

We share data only in these limited cases:

- **Within the server:** moderation records, logs and similar information created through the Bot are visible to the server's staff and administrators according to that server's configuration. Server owners are responsible for how they use this information.
- **Service providers:** hosting, database and monitoring providers that process data on our behalf under appropriate confidentiality obligations.
- **Third-party platforms:** Discord (the Bot necessarily communicates with Discord) and, if you use an integration, the relevant third-party service (for example Roblox or ER:LC APIs).
- **Legal reasons:** when required by law, or to protect the rights, safety and property of users, the public or ourselves.

5. Data Retention

- Server configuration and records are kept until a server administrator deletes them using the Bot's data deletion command.

- Removing the Bot from a server does not delete that server's data automatically. To delete it, a server administrator must run the Bot's data deletion command; the data is then deleted, unless we are legally required to keep it.
- Technical and error logs are kept for up to 30 days.
- You may also request deletion of your personal data by contacting us (see section 7).

6. Security

We use reasonable technical and organizational measures to protect data, including access controls and encrypted connections. Sensitive credentials such as API keys are stored securely and are never displayed publicly. No system is completely secure, so we cannot guarantee absolute security.

7. Your Rights and Choices

Depending on where you live, you may have the right to access, correct, delete, restrict or object to the processing of your personal data, and to receive a copy of it. To exercise these rights, contact us at nameless@thenamelessdev.com. We may need to verify your identity, and we will respond within a reasonable time (within one month for requests under GDPR).

Because much of the data is created by server staff, some requests (such as removing a moderation record) may need to be directed to the server's administrators. We will help where we can. You can also stop all future collection by removing the Bot from your server or by not interacting with it.

If you believe your data has been mishandled, you have the right to lodge a complaint with your local data protection authority.

8. Children's Privacy

Discord requires users to be at least 13 years old (or the minimum age in their country). The Bot is not directed at children under 13 and we do not knowingly collect their data. If you believe a child under the permitted age has provided data to us, contact us and we will delete it.

9. International Transfers

Our infrastructure may be located outside your country. Where personal data is transferred internationally, we take steps to ensure it remains protected as described in this policy.

10. Third-Party Services

The Bot interacts with Discord and may interact with other services. Their handling of your data is governed by their own policies, including the Discord Privacy Policy. We are not responsible for the practices of third parties.

11. Changes to This Policy

We may update this policy from time to time. The effective date at the top shows when it was last changed. Significant changes will be announced in the repository. Continued use of the Bot after changes means you accept the updated policy.

12. Contact

Questions or requests about this policy: nameless@thenamelessdev.com.
